

Pegasystems PEGACCA

Certified CPM Architect (CCA) Exam

Version: 4.0

QUESTION NO: 1

True or False, Flow-action-based dialog requires that a dialog rule be referenced from the assignment and flow action within the workflow diagram.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 2

True or False, For each individual CPM service item type, you can choose whether to use flow action-based dialog or assignment-based dialog.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 3

Which of the following is NOT a best practice in CPM dialog management _____? (Choose One)

- A. Dialog rules should be contained in a separate RuleSet from other configuration such as flows and flow actions
- B. Dialog scripts should contain "what to say"; not "what to do"
- C. Dialog scripts should include references to customer data
- D. CSRs should be encouraged to configure personal dialog scripts

Answer: D

Explanation:

QUESTION NO: 4

Which of the following would you configure in order to specify the subset of properties that can be included within dialog scripts. (Choose One)

- A. Interaction driver rule
- B. Decision table rule within the dialog class
- C. Data source rule
- D. Map value rule within the dialog class

Answer: C

Explanation:

QUESTION NO: 5

Which of the following is a best practice for design of the CPM composite area? (Choose One)

- A. Data that is visible in the composite should never be repeated/duplicated in service item flow actions
- B. Sections within composite tabs should allow for data edit/update
- C. Composite tabs should be conditionally displayed based on the customer

Answer: C

Explanation:

QUESTION NO: 6

True or False, As a best practice, you should embed all CPM customer composite pages within the pyWorkPage of the service item/object.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 7

True or False, Switching the CPM Composite "context" refers to conditionally displaying tabs based on customer data.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 8

Which of the following is NOT a valid knowledge topic content type. (Choose One)

- A. File
- B. Activity
- C. HTML
- D. URL
- E. Authored

Answer: C

Explanation:

QUESTION NO: 9

Which of the following statements about CPM Knowledge content is true? (Choose One)

- A. Can be directly associated to a flow/flow action
- B. Can be suggested based on logic
- C. Can reference content that is stored on external systems
- D. Is available via CPM portal search functions
- E. All of the above

Answer: E

Explanation:

QUESTION NO: 10

To specify the numeric scoring values for a question within a quality review or customer satisfaction survey, choose one componet you would configure. (Choose One)

- A. A map value rule

- B. A decision tree or decision table rule
- C. The CPM survey rule form

Answer: C

Explanation:

QUESTION NO: 11

True or False, By using the CPM SLA override service process, you can identify an SLA rule that should be used for all work for a specified customer for a specified period of time.

- A. True
- B. False

Answer: A

Explanation:

QUESTION NO: 12

To configure the CPM interaction goal value, you would _____. (Choose One)

- A. Modify the Interaction Driver rule
- B. Modify the Intent When rule linked to the Interaction Driver
- C. Modify the interaction goal Decision Table
- D. Modify the SLA rule for the interaction class

Answer: C

Explanation:

QUESTION NO: 13

The purpose of a CPM quality review is to _____. (Choose One)

- A. Assess system health and performance
- B. Assess CSR performance in handling a customer request
- C. Analyze historical workflow accuracy
- D. Assess end user feedback on workflow screens

Answer: B

Explanation:

QUESTION NO: 14

Which one of the following is a benefit of interaction goal processing within CPM? (Choose One)

- A. Deliver customer service that is personal and tailored to the customer and situation
- B. Route interactions to the user that is best able to handle the customer request
- C. Automates manual tasks for better straight-through processing of requests

Answer: A

Explanation:

QUESTION NO: 15

Which one of the following CANNOT be configured using the CPM Configuration Tools Wizard? (Choose One)

- A. Dialog scripts
- B. Suggested processes
- C. Coaching tips
- D. Association of knowledge content to a user screen

Answer: B

Explanation:

QUESTION NO: 16

Which of the following is NOT a coaching tip best practice? (Choose One)

- A. Coaching tips are a good way to reinforce training for a new process
- B. The text of the coaching tip should be short and to the point
- C. Coaching tips are a good way to provide instructions on what content should be entered in particular field
- D. For maximum impact, coaching tips should be assigned to a user for a short duration

Answer: C

Explanation:

QUESTION NO: 17

True or False, The CPM Estimated Application Savings Report is used to quantify the cost of implementing CPM.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 18

In CPM, a "contact" refers to _____? (Choose One)

- A. Communication between a person and the organization
- B. A person that is a customer, prospect, partner, or other third party
- C. All of the above

Answer: B

Explanation:

QUESTION NO: 19

Which of the following statements is true about CPM interactions? (Choose One)

- A. Enable users to manage multiple service requests as part of a single customer session
- B. Inherit from the Work-Cover- class
- C. All of the above are true

Answer: A

Explanation:

QUESTION NO: 20

True or False, In CPM, the class group for Service Items inherits from the class group for Interactions.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 21

True or False, In most implementations, CPM becomes the system of record for customer information such as account data and financial account transactions.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 22

Which of the following would be important to know if you were evaluating the impact of potential process improvements on your company's business objectives? (Choose One)

- A. The volume of interactions per period and the mix of interactions by reason
- B. The amount of time spent on each step of a service process (user time or wait time)
- C. First call resolution rates and the reasons that trigger multiple calls
- D. All of the above

Answer: D

Explanation:

QUESTION NO: 23

The starting activity for a CPM service item should be saved in the _____. (Choose One)

- A. Class of the service item
- B. Interaction class
- C. Concrete service item class group

Answer: A

Explanation:

QUESTION NO: 24

Which of the following rule types is not typically added when configuring a new CPM service item? (Choose One)

- A. Model
- B. Flow
- C. Harness
- D. SLA

Answer: C

Explanation:

QUESTION NO: 25

True or False, A CPM service item that is started in one interaction channel (e.g., email), can be resolved during a subsequent interaction in a different channel (e.g., phone).

- A. True
- B. False

Answer: A

Explanation:

QUESTION NO: 26

True or False, A CPM service item object can be a "cover" (i.e., has a class that inherits from the Work-Cover- class).

- A. True
- B. False

Answer: A

Explanation:

QUESTION NO: 27

True or False, You should NOT run the CPM Service Process Accelerator to create a new service item if the PRPC Application Accelerator has been used to generate the new work type.

A. True

B. False

Answer: B

Explanation:

QUESTION NO: 28

Your company is implementing CPM to manage its customer service interactions which include new product orders, returns, repair requests, billing inquiries, etc. There are 25 request types in total. For the initial implementation, processing of these requests will be largely "capture and route"; where the CSR will capture details of the request and then it will be routed to another department to complete processing. In future implementations, process steps for each request type will be automated according to its frequency and priority. These automated steps will vary significantly by request type. Which design will give you maximum flexibility. (Choose One)

A. Create a new service item work type for each request type. Use a common workflow that is called by each service work type. In a future release, create workflows that are specific to each request type.

B. Create a single "general service item" work type that will be used for every service type. Add multiple Interaction Driver task entries for each request type that point to the general service item work type. In a future release, circumstance elements of the request process to vary by request type.

Answer: A

Explanation:

QUESTION NO: 29

True or False, To maintain backward compatibility with future CPM releases, you should not

override the workflows, flow actions, or sections used within CPM service items/processes.

- A. True
- B. False

Answer: B

Explanation:

QUESTION NO: 30

You should minimize the number of comments fields used within service item screens because _____. (Choose One)

- A. Typing many comments impedes user productivity
- B. Free form comments are hard to read and understand during subsequent customer interactions
- C. It is more difficult to report on data contained within comments than it is to report on data contained within named fields
- D. All of the above

Answer: D

Explanation:

QUESTION NO: 31

True or False, CPM service processes can be completed (Resolved) during an interaction, or can remain open and continue processing after the interaction is completed.

- A. True
- B. False

Answer: A

Explanation:

QUESTION NO: 32

The CPM Interaction Driver is used to _____? (Choose One)

- A. Identify the customer by name or account

- B. Select and launch service processes for the customer
- C. Verify the customer

Answer: B

Explanation:

QUESTION NO: 33

To add a new task to an existing Interaction Driver category you would _____.
(Choose One)

- A. Update the Interaction Driver rule
- B. Add an Intent Task rule
- C. Add an Intent When rule

Answer: B

Explanation:

QUESTION NO: 34

True or False, A task can appear in more than one CPM Interaction Driver category.

- A. True
- B. False

Answer: A

Explanation:

QUESTION NO: 35

Your company is implementing CPM to manage the account services function and other public inquiries (such as literature requests, etc). The company has 5 different account types and 10 different account request types such as billing, shipping, etc. In their current system, CSRs first choose the account type then proceed to handle the request type. 75% of the steps used to process requests are the same for each account type and all request types are applicable to each account. Some areas such as entry screens and service levels vary by type of account. You have already configured interaction search and customer verification, and have configured the CPM composite area to display account details such as account type, status, recent transactions, etc. You must now design the Interaction Driver function. You have already created an Interaction

Driver category, tasks, and service items to handle the general public inquiries. Which of the following is the best design for the account services functions? (Choose One)

- A.** Create Interaction Driver categories for each account type. Create a new CPM service item type for each account/request type combination and customize where differences exist.
- B.** Create Interaction Driver categories for each request type (e.g., Billing, Shipping). Create new CPM service items for each account type, and then add Interaction Driver tasks so that each account type service item exists in each request type category. Circumstance elements of the service processes where differences exist.
- C.** Create an Interaction Driver task category for account services. Create a new service item type for each request type. Automatically populate the account type on the service item object from composite clipboard pages. Circumstance elements of service process where differences exist.

Answer: C

Explanation:

QUESTION NO: 36

True or False, If more than one Intent When rule is associated with an Intent Task rule, they are evaluated using the logical condition "OR".

- A.** True
- B.** False

Answer: A

Explanation:

QUESTION NO: 37

Your business analyst has requested that you conditionally display tasks within the Interaction Driver depending on specific customer data. For example, only show Task A and Task B if the contact is the owner of the account. The best approach to accomplish this would be to _____. (Choose One)

- A.** Configure an Intent When rule and link it to the Intent Task for each task that should be conditionally displayed
- B.** Create a new task category that only appears if the customer data criteria condition is met. For example, "Account Owner Tasks"
- C.** Train users not to select the tasks for specific types of customers. Create a report to monitor compliance

Answer: B

Explanation:

QUESTION NO: 38

The text that displays to the user as the task name within a CPM Interaction Driver category list is _____. (Choose One)

- A. The HeaderTitle field value that is defined within the service item class
- B. The short description of the starting workflow for the service item
- C. The short description of the Intent Task rule
- D. All of the above

Answer: C

Explanation:

QUESTION NO: 39

Which one of the following cannot be configured using the CPM Interaction Driver rule. (Choose One)

- A. The order of task categories that is displayed during a customer interaction
- B. Whether or not suggestions are evaluated for a particular task category
- C. Whether or not offers are evaluated for an interaction
- D. The logic criteria used to suggest a task or offer

Answer: D

Explanation:

QUESTION NO: 40

The class of the Intent Task rule determines _____. (Choose One)

- A. The class in which the task will execute
- B. The category in which the task will appear in the Interaction Driver
- C. All of the above

Answer: B

Explanation:

QUESTION NO: 41

Which of the following is NOT a benefit of suggesting processes to a user during a customer interaction? (Choose One)

- A. Reduced user training time
- B. Improved user productivity
- C. Improved customer satisfaction
- D. None. All of the above are benefits

Answer: D

Explanation:

QUESTION NO: 42

Which one of the following is not a standard work pool/class group within CPM? (Choose One)

- A. Interactions
- B. Service items
- C. Satisfaction surveys
- D. Quality review

Answer: C

Explanation:

QUESTION NO: 43

Your business analyst has requested that you suggest a process to a user during a customer interaction based on the % of other customer interactions in which this process was performed. For example, suggest a new claim process if more than 75% of customers with a similar profile also requested this process. To implement this request, you would _____. (Choose One)

- A. Configure a Case Match rule to look for claim items for similar customers
- B. Configure an Intent When rule that specifies an event type of claim
- C. Configure an Intent When rule that specifies a likelihood percentage

Answer: C

Explanation:

QUESTION NO: 44

When designing UI components, which of the following is NOT a best practice? (Choose One)

- A. Know the standard screen resolution for end user desktops
- B. Place required data entry so that the user can "tab" to complete them
- C. Within process screens, use conditional displays
- D. Use bold text and many colors to make important fields stand out
- E. Avoid non-standard acronyms and abbreviations in captions

Answer: D

Explanation:

QUESTION NO: 45

Which of the following steps is necessary in order to configure CPM portal search for an external data source (such as account data from a legacy system)? (Choose One)

- A. Enable PRPC work indexing on your system
- B. Specify a search retrieval activity on the CPM data source rule
- C. Modify the list view rule used for portal search to include your data source

Answer: B

Explanation:

QUESTION NO: 46

The CPM Tabbed Navigation method _____. (Choose One)

- A. Enables users to have more than one service item active during the same time
- B. Enables users to have more than one interaction active during the same session
- C. Requires configuration of a separate Interaction Driver rule than the one that is used for the Classic Navigation method
- D. Is the preferred navigation method

Answer: A

Explanation:

QUESTION NO: 47

Which one of the following statements about the CPM user interface is correct? (Choose One)

- A. End users can create their own personal UI themes to change the appearance of CPM portals
- B. Developers can use the PRPC Branding Wizard to modify or augment CPM portal styles
- C. End users cannot view interaction cases (work objects) in the CPM customer case portal
- D. The CPM interaction portal allows end users to have multiple interactions open at the same time; but they must be of the same type (e.g., phone call, chat)

Answer: A

Explanation:

QUESTION NO: 48

In order for service items/cases to be visible in CPM portal search results, _____. (Choose One)

- A. The service item work type must be listed on the Application rule
- B. The CPM data source rule must be configured as "portal search"
- C. Both of the above conditions must be met

Answer: A

Explanation:

QUESTION NO: 49

Which rule would you modify to limit the number of interaction tabs that can be opened at any one time within the CPM interaction portal? (Choose One)

- A. Portal rule for the CPM Interaction portal
- B. Harness rule for the CPM Interaction portal
- C. Section parameters for the CPM Portal Gadget section

Answer: C

Explanation:

QUESTION NO: 50

Which one of the following is not a valid result type when using the CPM portal search function?
(Choose One)

- A. Knowledge content rules
- B. Service item work objects/cases
- C. External data sources such as accounts or contacts
- D. Workbaskets (work queues)

Answer: D

Explanation:
